Our final ideas:

Interviews Questions only

We will create some interviews Questions sessions (HR & Technical)

HR

How many years of Experience

Date of join

How many languages you are abled like (English,

French,

Urdu,

etc.

)

Etc.

Technical

What is your

Technical

expertise?

Do you have any technical certifications

How many development tools have you used

(Word, excel and

etc.

)

?

Large Scale Hiring

There will be a good database of managing the large

(

NoSQL database

)

The database we

choose

it

should be easy to integrate into your app.

And updated frames will used

New Candidate Alerts

The app will tell about first time applied candidate

And also show the old candidate

Resume Builder (Signup details)

There will be own resume/cv builder of app

Number of time applied

It will show the candidate how many time applied for same jobs and also the different jobs

Notable Points:

The uploaded CV will automatically fill the applied form of jobs

Divide the applied candidate CVs
